iDigital

Hygienic Cladding with any design possible!

Replace traditional wall coverings with this impact resistant and hygienic cladding which incorporates our unique industrial grade hard coating.

High resolution images digitally printed direct to rigid PVC substrate and coated with the excellent iGaurd Hard Coating technology. This amazing hard coating offers permanent protection to the printed surface providing abrasion and chemical resistance that protects against long term wear and tear together with the most robust cleaning regimes.

Common applications for iDigital include:

Healthcare
Wet rooms and public toilets facilities
Hotel bathrooms
Leisure facilities
Catering areas (i.e. Kitchens)
Front of house (i.e. Restaurants)

This unique cladding technology allows you to replicate any traditional wall cover material such as tiles, wood panelling and marble or apply a completely unique design of your choice.

In addition to a consistently perfect finish the iDigital hygienic cladding solution allows speedy installation reducing fitting costs, down time and closures compared to traditional wall coverings such as tiling.

The images have been photographed in super high resolution using state-of-the-art cameras and techniques. All images are suitable for cladding up to 3m high and have been designed to repeat perfectly.

About The Artist

Richard Osbourne is a British photographic artist who specialises in creating art images that are printed at large sizes. A professional photographer since 2003, Richard's artworks are seen by over 8 million people in Britain every year: they are on the walls of hospitals, conference centres, offices, leisure centres and private homes.

Richard has created this unique collection of Super High Resolution panels to bring these beautiful materials to interiors and products.
